Asteres Inc. Announces Hansen Retirement

San Diego, CA June 3, 2009 — Asteres Inc., the industry's leading provider of automated prescription pickup kiosks and makers of ScriptCenter[®], announced today that Bob Hansen, PharmD, will retire from his position as VP of Pharmacy Services.

"Bob was extremely instrumental in the early success of ScriptCenter," said Linda Pinney, Founder and CBO. "He has forever changed the regulatory landscape in the majority of states in this country. He is a true regulatory pioneer."

"As the 6th employee of Asteres, it is with mixed emotion that I announce my retirement from Asteres," said Bob Hansen, PharmD. "After years of travel, it's time to stay closer to home knowing that ScriptCenter is making its way into pharmacies nationwide."

Bob came to Asteres from Longs Drugs, where he was the vice president of Pharmacy Operations. Bob has 30 years of experience in the retail drug industry. He began his career at Longs as a staff pharmacist and quickly worked his way up the ranks of pharmacy management. In 1998, Bob was promoted into Longs' corporate office to establish a pharmacy marketing and category management department, where he successfully launched chain-wide customer healthcare programs. In his role as vice president of Pharmacy Operations, Bob was responsible for the operation and automation of over 460 pharmacies, the mail order division and the opening of the first retail central fill facility in the Western United States. Bob did his pre-pharmacy work at San Jose State University, and received his Doctorate of Pharmacy from the University of California at San Francisco.

ABOUT ASTERES

Asteres Inc. develops secure self-service kiosks for the storage and delivery of prescriptions and consumer products. Asteres' premier product is ScriptCenter, the first prescription pick-up kiosk for retail, healthcare and military pharmacies that allows patients to pickup and pay for their prescriptions even when the pharmacy is closed.
